

## Press Release

### **Wacker Neuson expands its extensive range of high-performance pumps**

#### **New, reliable high-performance submersible pumps**

**(Munich, April 19, 2010) Wacker Neuson SE has added several new models to its range of electrical submersible pumps. The company offers a comprehensive portfolio of pumps to cover the varying requirements of the construction, gardening/landscaping and related sectors. The latest additions to the Wacker Neuson pump portfolio are every bit as robust and powerful as its offerings to date.**

#### **High-performance submersible pumps**

"The new PS-series electrical submersible pumps are designed to handle high flow volumes and lifts, so they are the ideal solution whenever a building site has to be dewatered with ease, speed and reliability," explains Robert Brauneis, utility product manager at Wacker Neuson. These versatile pumps are engineered with a particular focus on safety. They feature thermal overload protection, internal mechanical seals and oil lifters. Heat generated by overcurrent, rotor blockage or dry-run conditions is detected immediately and the motor cuts out automatically. In addition to the extremely powerful 1.5 kW AC pump with 2-inch pump outlet, the company has now launched aluminum DC submersible pumps as a lightweight option for use in construction.

#### **Broad portfolio to suit every need**

Wacker Neuson has introduced a new subgroup of submersible pumps: the PSC series. These pumps can reliably handle clear and trash water as well as waste water and liquid containing fibrous particulate matter. Integrated cutting equipment breaks up larger pieces of solid matter. "Our wide range of different motors and design concepts means we can offer the perfect fit for every customer," continues Brauneis. "We advise each customer individually to find the best solution." The entire Wacker Neuson portfolio includes pumps for differing degrees of contamination with varying volumes and pumping water levels and electric or diesel/gasoline engines.

### **About Wacker Neuson**

Wacker Neuson SE is a global manufacturer of light and compact equipment. With over 30 affiliates and more than 180 sales and service stations across the globe, the new company offers a unique product portfolio. Almost all products manufactured by the company are branded Wacker Neuson. The only exceptions to this in Europe are Kramer-branded all-wheel loaders and Weidemann-branded agricultural machinery, which the company plans to strengthen and expand. With over 300 product categories and complementary rental, spare parts and repair services, Wacker Neuson is the partner of choice among professional users in construction, gardening, landscaping and agriculture, as well as among municipal bodies and companies in the industrial and recycling sectors.
